HOPEFULNES IN ENGLAND.

Letter to Agent Robert W. Boys Describes Conditions There.

From a friend at Rheddis, England, Agent Robert W. Boys of the Killingsby Manufacturing company at Williamsville has another letter of interest relative to war time conditions in the "tight little Isle."

"The whole life of the people is changed," says the writer. "There are hundreds of wounded limping about and the sorrow of those who have lost relatives brings the war into a sad reality. There is no intense depression, rather the opposite, in fact. A note of confidence in the issue is predominant, but the cost of it is the source of anxiety amongst those who are home with relatives away fighting."

"The system for breaking in the new armies is for them to take a turn under fire for a short time each day in the trenches, in reserve when heavy fighting is on. Being drilled in fact, in front of the enemy, and you will see the result of this. When the time comes for a big move the whole army will be experienced soldiers, with tried nerves and used to the methods of fighting and taking orders under fire, as well as to the artillery, which, I take it, is the worst thing of all to get accustomed to."

"There have been some blundering at the Dardanelles, but the lessons have been well learned and this time will see a different result. Had this job been taken in hand at the entrance of Turkey in the war the difficulties would not have been so great."

After discussing German submarine tactics and boasting of the attack of under-sea boats of the Germans on travelers, refugee ships and hospital ships filled with wounded as dastardly, the writer makes the significant remark, "I think you may take it there will be no more prisoners taken from submarines."

"We have been too forebearing, I feel, but there is a very different feeling creeping up which is going to be pretty bad for Mr. German when it makes itself felt."

That England is keeping up its usual policy of navy building is indicated by information in the letter to the effect that several fine battleships of the super-dreadnought type are nearly completed, so they (Germans) cannot hope to take advantage of time to better their prospects on the sea.

son. There was a large audience and Mrs. Bartlett's fine address was very cordially received. As president of the Putnam Equal Franchise league, this was very interesting to Mrs. Bartlett in view of the fact that the national league has endorsed woman suffrage, although the endorsement of it by subordinate leagues is entirely in their own hands. Refreshments were served at the meeting, which was a splendid one. On May 16th Mrs. Bartlett is to speak at East Woodstock in response to an invitation from the Community club, a men's organization that is doing good work.

At the Senectex garage meeting Mrs. Bartlett said: In every farming district as well as in the cities, the women are putting their shoulder to the wheel. The farmer's wife is his partner in his burdens, profits, losses and in many other ways. Why shouldn't she be in his privileges? The national garage has declared emphatically and unanimously for equal suffrage.
